# PHIMPHIMAI BURANCHAI

Data Analyst | BI Analyst | Customer & Business Analytics
Bang Na, Bangkok | 098-482-4772 | Phimphimaiburanchai@gmail.com
Portfolio: phimphimaipim.vercel.app | GitHub: github.com/PIM-DATA

## PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Databricks, Power BI, and Looker Studio, focusing on business data preparation, dashboard development, data validation, and ad-hoc analysis. Skilled in customer analytics, RFM segmentation, purchase behavior, and KPI reporting, with a background in social and consumer insight and practical use of AI tools to support analysis and problem solving.

## TECHNICAL SKILLS

**Data & Query:** SQL, Databricks, Data Preparation, Data Cleaning, Data Quality Checking

**BI & Reporting:** Power BI, Looker Studio, KPI Reporting, Microsoft Excel

**Analytics:** Customer Analytics, RFM, Customer Segmentation, Purchase Behavior, AOV, Basket Size, Repeat Purchase

**Digital Analytics:** Google Analytics 4 (GA4), Web Traffic & User Behavior Analysis

**AI Tools:** ChatGPT, Claude

**Social Insight:** Social Listening, Sentiment Analysis, Social Trend Analysis

## PROFESSIONAL EXPERIENCE

**7 DAYS SUCCESS CO., LTD.** | Jun 2022 – Present

**Data Analyst** | Feb 2026 – Present

- Built an automated hourly sales report (Databricks, Python, GA4) that posts to the Marketing team's chat on schedule throughout every sales window — with completeness checks that hold the report if any source is incomplete.
- Measured the sales impact of LINE OA broadcasts by joining broadcast exports, GA4 sessions, and orders — giving Marketing site visits and buyers for each send, not just opens.
- Built customer analytics datasets on Databricks (RFM, AOV, basket size, purchase frequency, repeat purchase, segments) that feed recurring dashboards and 27 ad-hoc requests from Marketing, Revenue, and CRM teams in four months.
- Traced reporting discrepancies to their root cause (duplicates, missing values, time-zone and partial-day errors) and set validation checks that now run before every report.
- Translated business questions into metrics and Power BI / Looker Studio dashboards, and designed a Databricks Genie space so non-technical teams can get answers on their own.

**Business Intelligence Developer** | Sep 2025 – Jan 2026

- Designed Power BI dashboards, prepared multi-source data for reporting, and reduced weekly report preparation time by approximately 40%.
- Created data quality checks to reduce reporting errors before presentation.

**Monitoring & Social Insight Specialist** | Jun 2022 – Sep 2025

- Analyzed social media data through social listening to identify trends, sentiment, and emerging brand issues.
- Prepared insight reports for marketing and communication teams.

**IDA INTELLIGENT DATA ANALYTICS CO., LTD.** | 2020 – 2022

**Social Intelligence Service Officer**

- Collected and analyzed multi-channel online data for corporate clients.
- Monitored issues that could develop into crises, assessed potential impact on brand reputation, and summarized key developments.
- Prepared crisis monitoring and insight reports to support timely client response and decision-making.

## SELECTED PROJECTS

**Customer Analytics & RFM Segmentation** — Prepared customer profile datasets covering RFM, AOV, basket size, purchase frequency, customer segments, and repeat-purchase behavior.

**Lottery Analytics** — Prepared and validated datasets for customer, order, purchase-round, lottery-checking, and prize analysis for dashboards and ad-hoc reporting.

**Interactive Dashboard Rebuilds** — Four production Power BI / Looker Studio reports rebuilt for the web with synthetic data: phimphimaipim.vercel.app/#/dashboard

## EDUCATION

**Bachelor of Arts in Chinese for Communication** | Rajamangala University of Technology Krungthep
